RESEARCH PROFILE

I am an evolutionary language scientist investigating how language structures change over deep time, and what their evolution reveals about cultural evolution and human cognition. I employ a primarily Bayesian toolkit: phylogenetic tree inference, phylogenetic comparative methods, ancestral state reconstruction, and phylogeographic regression. My PhD and subsequent published works develop phylogenetic methods for phonology, particularly phonotactics, with a regional focus on languages of Australia. In parallel, I work on the evolution of conceptual categories (nominal classification, case semantics, number), with work extending to broader Sahul (Australia and New Guinea), Tibeto-Burman, and worldwide language samples. Most recently, I have turned attention to the design of agentic LLM pipelines for large-scale extraction of linguistic data from published grammars.

SKILLS

Statistical methods. Bayesian inference and multilevel modelling (brms), Bayesian phylogenetic tree inference (BEAST), phylogenetic comparative methods, ancestral state reconstruction, phylogeographic regression (BayesTraits, R).

Programming. R (highly proficient, including the tidyverse, Bioconductor suite, phylogenetic packages [ape, phytools], geospatial packages [sf]), Python, Javascript, LaTeX.

Research automation. Design of agentic LLM pipelines for large-scale extraction of linguistic data from published grammars. Agents consult structured knowledge bases, iteratively draft, self-critique and refine their output, and record grammar-specific idiosyncrasies for later use.

Data visualisation. ggplot2, ggmap, ggtree. Interactive apps and mapping (Shiny, leaflet).

Open science. Git (`https://github.com/JaydenM-C`), Zenodo/OSF (e.g. `https://zenodo.org/records/7257104`). Reproducibility tools (renv, Docker).

R PACKAGES

`phonfreq`. A package for visualising phoneme frequency distributions in Australian languages.

`CLtemplate`, `DeGruytertemplate`, `LDCtemplate`, `UQpresentation`. A series of packages providing Rmarkdown templates for authoring *Computational Linguistics* articles, De Gruyter articles and books, *Language Dynamics and Change* articles and University of Queensland-branded slideshow presentations. All at `https://github.com/JaydenM-C/`[name].

PUBLIC REPOSITORIES

`JaydenM-C/PN_treebuilding`. A repository of code (R, C, TeX) for inferring phylogenetic trees from phonotactic and lexical data.

`JaydenM-C/chromatography`. Codebase for Chromatography (`https://chromatography.pages.dev/`). A web-based desktop app for crafting colour palettes from photographs.

`JaydenM-C/rawshuck`. Codebase for Rawshuck (`https://rawshuck.pages.dev/`). A web and Python app for culling RAW+JPEG photo shoots, discarding unwanted RAW files independently of their JPEG counterparts.

`JaydenM-C/sc-alchemist`. Repository of code (Python) implementing MCMC optimisation for AFL fantasy team selection, with user-defined constraint functions.

`JaydenM-C/AusErdle`. Codebase for the AusErdle app, a Wordle spinoff using Australian English phonemic transcriptions.

PROFESSIONAL EXPERIENCE

Oct 2026–present

Postdoctoral Researcher
Institute for the Interdisciplinary Study of Language Evolution (ISLE Institute)
University of Zurich
Project: Conceptual Diversity and the Evolution of Abstract Thought (CONCEVO) (Prof J. Mansfield

Jun–Sept 2026

Postdoctoral Research Fellow
Surrey Morphology Group
University of Surrey, UK
Project: Revoluphon: Rational Evolutionary Phonology (Prof E. Round)

Dec 2022–Aug 2025

Lecturer in Linguistics tenure equivalent
School of Creative Industries, Humanities and Social Sciences
University of Newcastle, Australia

Nov 2021–Nov 2022

Postdoctoral Researcher
UMR 5596: Laboratoire Dynamique du Langage (DDL)
CNRS, Université Lumière Lyon 2, Lyon, France
Project: EVOGRAM: The role of linguistic and non-linguistic factors in the evolution of nominal classification system (Dr M. Allassonnière-Tang)

EDUCATION

Jun 2021

Ph.D. (Linguistics)
The University of Queensland, Australia
Thesis: Phonotactics in historical linguistics: Quantitative interrogation of a new data source. [link]
Supervisors: Prof Erich Round, Dr Simon Greenhill
Award: Dean's Award for Outstanding HDR Theses

Jun 2015

Bachelor of Arts (Honours, Class I)
The University of Queensland, Australia
Major: Linguistics (extended)
Minor: Aboriginal and Torres Strait Islander studies
Award: University Medal

RESEARCH ASSISTANT EXPERIENCE

2013–2015

Research Assistant
University of Queensland, Australia

- AusPhon database of Australian language sound systems.
- Yukulta (Ganggalida) field recording transcription.
- Source digitisation for microvariate typology project.

VISITING POSITIONS

Aug 2025–May 2026 **Visiting Scholar**, Surrey Morphology Group, *University of Surrey*

Jan–Feb 2025 **Sponsored Guest**, Dept. of Linguistics, *The Ohio State University*

Jun–Jul 2024 **Sponsored Guest**, Dept. of Linguistics, *The Ohio State University*

Jan–Feb 2024 **Sponsored Guest**, Dept. of Linguistics, *The Ohio State University*

PUBLICATIONS

Macklin-Cordes, Jayden L. Revisions pending. Trees beyond words: phonotactics in linguistic phylogenetics. *Diachronica*

Macklin-Cordes, Jayden L., Maria Copot, Mitch Browne & Tom Ennever. Revisions pending. Signal separation: Quantifying inheritance and contact in language evolution. *Journal of Language Evolution*

FUNDING

Research

2023 **New Start Grant**, College of Human and Social Futures, University of Newcastle, Australia $5,000 AUD
Project: Language and Landscape: Building foundations between macro- and micro-scale linguistic evolution, culture, and environment

2016–2018 **Transdisciplinary and Innovation Grant**, ARC Centre of Excellence for the Dynamics of Language $19,909 AUD
Role: Lead investigator
Project: TIG0116JMC: A 'data well' prototype for Sahul phonologies

2016–2020 **RTP Scholarship**, Australian Federal Government Research Training Program $28,092 AUD/annum (3.5 years)
Project: Cost-of-living stipend for PhD program

Travel

2024 **Conference Travel Grant**, College of Human and Social Futures, University of Newcastle, Australia $3,500 AUD

2022 **Conference Travel Grant**, College of Human and Social Futures, University of Newcastle, Australia $2,434 AUD

2017 **LSA Summer Institute Fellowship**, Linguistic Society of America $1,990 USD

TEACHING

Courses taught

University of Newcastle, Australia

2025, Sem 1 **LING3350 Structure of English** (3rd year undergraduate, 112 students)
Student evaluation: 4.2/5

2024, Sem 2 **LING3350 Structure of English** (3rd year undergraduate, 50 students)
Student evaluation: 4.6/5

2024, Sem 1 **LING3350 Structure of English** (3rd year undergraduate, 86 students)
LING6910 Foundation of Linguistics (1st year masters, 5 students)
Student evaluation: 4.8/5

2023, Sem 2 **LING3350 Structure of English** (3rd year undergraduate, 74 students)
Student evaluation: 4.6/5

2023, Sem 1
LING3350 Structure of English (3rd year undergraduate, 78 students)
LING3002 Syntax (3rd year undergraduate, 8 students)
Student evaluation: 4.4/5

University of Queensland, Australia

2015, Sem 2
LING1005 Introduction to linguistics: the sound pattern of language (1st year undergraduate, ~220 students)
LING6105 Introduction to linguistics: phonetics and phonology (1st year masters, ~30 students)

Other teaching contributions

University of Newcastle, Australia

2024, Sem 2
LING2501 Cross-cultural communication (coordination; 2nd year undergraduate, 7 students)
LING6070 Cross-cultural communication (coordination; 1st year masters, 4 students)
LING1112 Languages in the World (2× guest lectures; 1st year undergraduate, 18 students)
LING3008 Introduction to phonology and morphology (marking; 3rd year undergraduate, 100 students)

PhD supervision

Dec 2025
Dr. Condra Antoni – *University of Newcastle, Australia*
Managing interaction with students in online EMI lectures at Indonesian Polytechnic Institutes.
Co-supervisor: Dr Jaime Hunt

Honours supervision

Jan 2024–Jun 2025
Mr Joshua Osborn – *University of Newcastle, Australia*
Evolution of noun class semantics in Australia.

Courses tutored

University of Queensland, Australia

2021, Sem 1
LING2010 Phonology guest tutor

2017, Sem 2
LING6105 Introduction to linguistics: phonetics and phonology

2016, Sem 1
LING1000 Introduction to linguistics: structure and meaning of words and sentences

Project supervision

Jan–Feb 2019

University of Queensland, Summer Research Program
The sound patterns of Sahul–the continent of Australia–New Guinea
Digitisation of scanned PDF language resources into machine-readable text, creating ontologies of linguistic concepts and automating extraction of interlinear glossed text.
Duties: Train team of undergraduate research scholars on research principles, data management, specialist software. Daily management, progress reports and research output.

AFFILIATIONS

2025

Institute for Regional Futures, *University of Newcastle, Australia*
Role: Affiliate

2023–2025

Laboratory for Applied Language Sciences (LALS)
Lead: Asst Prof Kiwako Ito, University of Newcastle
Role: Senior lab member

2023–2025

OzSpace: Landscape, language and culture in Indigenous Australia
Lead: ARC Discovery Project to Prof Bill Palmer, University of Newcastle
Role: Senior research associate

2015–2022

ARC Centre of Excellence for the Dynamics of Language
Role: Affiliate
